Ok, so this version of Blame It On Cain is at the end of my copy of My Aim Is True. I been able to find any tabs of it online so here we are.

Elvis Costello plays this version on a single acoustic guitar with a capo on the 3rd The chord names that I wrote above the lyrics are the chord names WITHOUT a capo, so with capo on the 3rd fret, just form those regular chords.

The lyrics for this version are also a little different than the full-band version of It On Cain. Hope someone finds this useful.

```
D              G       D            G
Once upon a time, I had a little money
               D                   G
Government burglars took it long
                D
before I could mail it to you
                   B            C   B
But you are the only one
                              D   G   D
Now I can't let it slip away
   Ab    A                        Ab   A
So if the man with the ticker tape
              Ab A
tries to take it
                                  D
well this is what I'm gonna say

              Bm
Blame it on Cain
                    D    D7
Don't blame it on me
   G          A
It's nobody's fault
         G                      D
But we need somebody to burn
              Bm
Blame it on Cain
G                             D
Please don't blame it on me
              G       A
It's nobody's fault
        G                      D
But it just seems to be his turn

I gotta break out one weekend
