How Good It Can Get

This is a VERY easy song to play on guitar. but basically so is every wallflowers song.This is just the rhythm guitar part to the song. Sounds great on an acoustic so try it out

Capo II

Intro / Verse

Em - C - D - G

Pre Chorus | G - C - Dsus - D

| G - D - Am

| on the pre chorus you can either play the c 0 3 2 0 1 0 or 0 3 2 0 1 3 either way sounds fine so try them out and see witch one you like better. Also you might wanna try hammering onto a dsus when you play the regular d its just a way to add a little bit to it and it sounds good if you DONT over use it
